**CLICKSAFETY LAUNCHES 23 NEW ONLINE SAFETY TRAINING COURSES**

**October 13, 2009, Alamo, CA**—[ClickSafety](http://ClickSafety.com), the leader in online safety training and risk management solutions, announces the release of 23 new online safety training courses focused around general industry and environmental professions. This addition to the ClickSafety online course library will be instrumental in helping all organizations address the safety training needs of their employees who might be exposed to hazardous substances during the work day.

These new courses will fall under the Awareness and General Industry categories in the ClickSafety online course library. They range from 5-15 minutes in length and are priced at only \$10 each (volume discounts are available). The new courseware includes:

- 1, 3 Butadiene
- 13 Carcinogens
- Acrylonitrile
- Air Contaminants
- Asbestos
- Benzene
- Bloodborne Pathogens
- Cadmium
- Coke Oven Emissions
- Cotton Dust
- DBCP
- DOT Markings
- Ethylene Oxide
- Formaldehyde
- Hazard Communications
- Hazardous Chemicals in Laboratories
- Inorganic Arsenic
- Ionizing Radiation
- Lead
- Methylene Chloride
- Methylenedianiline (MDA)

When asked why these courses were chosen for release, Ron Bruce, VP of Content for ClickSafety stated “We wanted to provide our customers with comprehensive coverage of the 23 toxic and hazardous substance topics that OSHA considers important enough to include in a special standard, 1910 Subpart Z. Many of these substances are considered to be carcinogenic.”
