

Manage Safety and Reduce Risk

Safety training and risk management are among the most critical issues in the construction industry. General contractors bear the responsibility and cost of making sure each subcontractor and worker on the job – electricians, plumbers, carpenters and more – are all trained to meet job-requirements and ensure 100% safety. Anything less can mean steep fines for lack of compliance, or worse, job-related injuries.

THE CHALLENGE?

How to cost-effectively train and communicate with these large, diverse teams in way that ensures their safety and meets requirements.

CLICKSAFETY® ANSWERS THAT CHALLENGE.

Our SubContractor Training Portal is a robust safety and risk management solution designed to meet the needs of general contractors and corporations by delivering customized, job-specific subcontractor training in a simple and cost-effective way.

CLICKSAFETY'S SUBCONTRACTOR TRAINING PORTAL INCLUDES:

- ✓ **Customized online training** – assess subcontractor training needs, then assign and implement training as needed for specific tasks.
- ✓ **Company- and site-specific information** – communicate policies and procedures, identify hazards and safe work practices, quickly deliver information such as designated parking areas, work schedules and regulatory requirements.
- ✓ **Standard safety and OSHA training material** – equip workers with the basics of on-the-job safety training.
- ✓ **Simplified reporting and compliance** – track training and competency real-time via web-based solution, easily download information for customized reports to meet regulatory and company requirements.
- ✓ **24/7 accessibility** – meet the needs of the today's mobile, diverse and dispersed workforce through a user-friendly, multi-lingual portal.
- ✓ **Customized and printable badges/access cards** – visibly validate completed training.

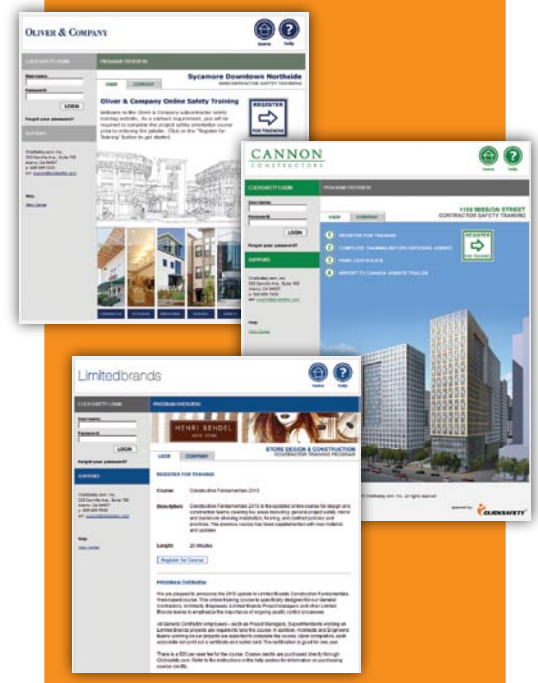

XL CONSTRUCTION

“ClickSafety has proved to be a very efficient and effective way of conducting OSHA training for XL’s field tradesmen, as well as for our subcontractors. We use ClickSafety on all of our jobsites to conduct our SubContractor Safety Program (SSP) and it continues to be a great vehicle for providing this training at a reasonable cost.”

Michael Popp, CLCS, CHST
 Director, Corporate Health & Safety
 XL Construction Corporation

WHY CLICKSAFETY®?

Companies such as Intel Corporation, Gilbane, Limited Brands, and Webcor Builders have implemented ClickSafety's SubContractor Training System and are realizing measurable benefits through our online safety training solution, including:

- ✓ **Increased accountability** of contract and temporary employees
- ✓ **Reduction of accidents and injuries**
- ✓ Consistent **communication of safety expectations** and requirements to contractors and subcontractors
- ✓ Improved operating margins and **reduced direct/indirect costs**
- ✓ Significantly **fewer business disruptions**
- ✓ Increased overall workforce **productivity**
- ✓ Improved track record of **meeting critical deadlines** and **project milestones**
- ✓ **Low-cost, highly effective training options**

CLICKSAFETY'S SUBCONTRACTOR TRAINING PORTAL HAS MINIMIZED INJURIES ON ALL OF OUR CLIENT PROJECTS.

We have done this by affording Supervisors, Safety Managers and Superintendents the time to effectively manage safety. In addition, the SubContractor Training Portal provides our customers with increased safety awareness and compliance among their contractors and subs. Our drill-down reporting capabilities allow administrative access to training records, ensuring that everyone on the project has completed the employer-required and state-mandated training to remain safe on the jobsite.

ClickSafety is the leader in online safety training solutions. We have delivered our award-winning interactive safety training solutions to over 6,500 organizations worldwide.

WEBCOR BUILDERS

"I especially appreciate the site-specific orientation that ClickSafety creates for all of our large projects. Each one includes site specific information and issues, OSHA requirements, our company code of safe practices and a site history. This helps our jobsites remain safety compliant, while giving all of our subcontractors a good solid baseline of knowledge before entering the jobsite. I have had over 2,000 workers trained on ClickSafety's program and I have found it to be a great advantage to my projects."

Keith Buchignani
Safety Coordinator
Webcor Builders
