

**FOR IMMEDIATE RELEASE**

## **ClickSafety receives IACET 2014 Exemplar Honorable Mention Award.**

**July 24, 2014** --The International Association for Continuing Education and Training (IACET) has awarded leading online safety training provider ClickSafety its prestigious 2014 Exemplar Training Organization Honorable Mention Award, an accomplishment achieved by very few companies within the United States.

The IACET Exemplar Award honors exemplary, results-oriented programs or projects that demonstrate cost-effective, significant and relevant impact for the clients of award recipients. This award also honors deserving programs that have significantly contributed to the field of continuing education and training.

IACET's overall mission is to advance the global workforce by providing the standard framework for quality learning and development through accreditation. ClickSafety fosters that mission within the construction and general industries, with an end goal of enabling clients to build and maintain cultures of safety. This Exemplar award follows on the heels of the company's recent designation as an IACET Authorized Provider as well as another industry award, the ISHN magazine 2014 American Society of Safety Engineers (ASSE) Attendee Choice Award for their GHS for Managers, Supervisors and Safety Personnel course.

"ClickSafety has consistently worked to provide industry-leading safety training to the country's premier construction and general industry firms, enabling them to establish sustainable safety cultures," said executive vice president and general manager, Brian Tonry. "This award validates that we are providing companies and individuals the highest level of safety education available. We are extremely honored to be recognized by a prestigious entity such as IACET."

Since 1999, ClickSafety's training solutions have been deployed to over 10,000 organizations worldwide, as well as leading construction, general industry and engineering firms. The company uses a flexible, customizable and interactive "student-centered" e-learning platform designed to ensure learning and retention. ClickSafety's online learning management and documentation solutions help organizations execute their training objectives and build world-class safety cultures.

### **About [ClickSafety.com](http://ClickSafety.com)**

ClickSafety is a leader in online training solutions for the construction, environmental and general industries. It has delivered award-winning interactive safety training to more than 10,000 organizations worldwide and was the first to offer both the OSHA 10-Hour and OSHA 30-Hour safety courses online. ClickSafety's course library has more than 300 courses and 50 courses available in Spanish – developed by Certified Safety Professionals (CSP), Safety Trained Supervisors (STS), Construction Health and Safety Technicians (CHST) and Certified Industrial Hygienists (CIH). Key products include OSHA regulatory training for general industry and construction, as well as several Web-based applications, Safety Passport®, that manage risks associated with training large groups of employees, subcontractors and contract laborers.

ClickSafety was founded in 1999 and is based in the San Francisco Bay area. ClickSafety is a subsidiary of [Ascend Learning](http://Ascend Learning), a leading provider of technology-based educational curriculum and assessment solutions for the healthcare industry and other vocational fields.

**About IACET:** The International Association for Continuing Education and Training (IACET) is a non-profit association dedicated to quality continuing education and training programs. IACET is the only standard-setting organization approved by the American National Standards Institute (ANSI) for continuing education and training. The ANSI/IACET Standard is the core of thousands of educational programs worldwide. For more information, please visit [www.iacet.org](http://www.iacet.org) or call 703-506-3275.
